

What our customers say about us

“

The collaboration with McomTech is pleasant and very efficient. They have developed a customised system that has easily digitised our business processes including ordering, delivery and route planning, personnel management, performance auditing and food traceability. In my opinion, McomTech can customise an old-fashioned ERP system at only about 10% of the usual cost.

B2B Order Managements System

Qmag Milchveredelung

Order Automation and Delivery System

QMAG uses the WhatsApp Order-Taking solution to collect weekly orders from their restaurant and take-away customers. Once orders are received, they're delivered using the Delivery Service provided by McomTech to deliver their product.

of Customers

Delivery Route Automation

With the WhatsApp Chatbot and Broadcasting functionality, QMAG actively engages its customers through WhatsApp and is able to reduce its administrative time managing orders manually.
